

Description

Owl IP20 LED Twin spot emergency offers a simple emergency lighting solution for various applications. OWL Twin spot features a novel lens system offering fine optical control resulting in high intensity beam patterns to ensure area is illuminated effectively. Standard comes as non-maintained with 3 hour duration. There is an option for DALI/Self-Test as below. The excellent performance allows the units to be mounted at very wide spacings making installation simple and cost effective.

The Owl units are supplied with high quality 3.6 volt 4Ah NiCd batteries.
