

Description

Cygnets Range is an LED system designed for continuous lines of light giving interest to almost any application. Available in recessed, surface, suspended and corners, the options are limitless. Cygnets Range houses the most efficient, latest generation LEDs with long life and energy efficiency. Designed for specific installations with choice of optics, sizes, Dali, RGB, IP ratings and much more. Cygnets range covers cove lighting and joinery through to signage lighting, each project is designed as required so please email for more information and/or specific project requirements.

Cygnets S6 is part of the range of profiles and the LED strip can either be used on its own housed in the numerous profiles available (please contact us if you require a size that is not on our website as others are available). The LED strip is available with up to 4 rows of LEDs or in higher outputs (See LED tape range). Cygnets S6 can house one row due to its slim, small profile.
